- BOSE Surround Sound System
- Interior with extended leather surrounds in black
- Interior package decorative stitching in special colour
- Additional Interior Package Gearshift and Door Panel Leather
- Lightweight carbon roof

Description:

The 911 GT3 with Touring Package's very own territory is the road - ideally a terrain full of winding challenges. With an output of 375 kW (510 hp) and a 4.0-litre 6-cylinder boxer high-revving naturally aspirated engine, it sets the sporty tone. Not everyone on the road will immediately recognise it, but that is precisely what enhances its purist appeal and the experience of driving it. The 911 GT3 with Touring Package does without the fixed rear wing. Thanks to the automatically extending spoiler, however, it still shows every bend where to go. For the first time, Porsche offers the 911 GT3 with two transmission variants. Drivers whose goal is to achieve the lowest possible lap time will find the ideal partner in **the Porsche Doppelkupplungsgetriebe (PDK)**. Our 911 GT3 also came with the optional **pneumatic lift system**. This provides the option of increasing everyday usability by raising the front body by around 30 millimetres. Another equipment extra is the **Porsche Ceramic Composite Brake (PCCB)**. With large brake discs, the PCCB achieves even more braking performance and wear resistance. The owner acquired the vehicle presented here in March 2022.

A good opportunity to acquire one of the sought-after 992 GT3 RS Touring in **an attractive colour combination with delivery mileage**.
