- Sports exhaust system
- Eton sound system
- 4-piston brake system
- Sports exhaust system
- Tuned Bilstein suspension
- Schmidt LM wheel 7,5 x 13" inch
- LED main headlights and LED

## Description:

The basis for the vehicle presented here was an Austin Rover Mini Moke, which the current owner, a passionate classic car collector from northern Germany, had **extensively converted and customised** by the **renowned specialist company Mini Mengers** over a construction period of several years, according to the documents available. Among other things, the **technology was extensively modified**. The rear section was completely redesigned by hand in order to gain sufficient space for a third axle. The extended wheelbase creates space for a **versatile transport box made of wood and stainless steel**. The **Alcantara-trimmed bucket seats** provide sufficient lateral support even when driving over sand and dunes, and the performance-enhanced Mini MPI engine ensures powerful propulsion. The car has a **German road registration**.

In the Mini community, the Mini Moke has always been the symbol of a carefree lifestyle. With the "Beach" design presented here, we have succeeded in making this cult racer even more individual, fun and cool as an **absolute one-off!**
