**THIESEN**  
AUTOMOBILE RARITÄTEN

## Description:

As the successor to the DB 5, which became famous through the legendary James Bond films, the DB 6 has a longer wheelbase and significantly more space. The DB 6 became famous through a test report in the magazine "Autosport" issue 11/1966, which attested a top speed of 152 mp/h (245 km/h) to the sports car.

In total, only **30 cars of the DB6 Volante** were produced in the **Vantage** version; 25 of them as right-hand drive and **5 as left-hand drive**.

According to available documents, the Aston Martin presented here was delivered to France and served as the **exhibition vehicle at the 1967 Paris Motor Show**. Later, the vehicle went to Switzerland before being sold to a respected Hamburg merchant family, in whose possession the car remains to this day.

It is **one of only 5 left-hand drive DB 6 Vantage Volante built**. Two of them were made for the USA and three for the European market. The car has German road registration. An **Aston Martin Built sheet** and a **valuation report** are available.

A **true collector's item** for the Aston Martin enthusiast.

## Equipment:

Vantage engine, 3.73:1 limited slip differential, chrome spoke wheels with centre lock, period radio, 5-speed gearbox, electric windows, wooden steering wheel, power steering, etc.
