Porsche has built 356 from 1948 to 1965 - the last und strongest step of this 356 Evolution was the Carrera 2000 GS with 130 PS (delivered by the so called Fuhrmann-Engine). Ernst Fuhrmann, the later CEO of Porsche, has constructed this spectacular engine originally only for the Motorsport with Porsche. The construction of this engine was complicated , the camshafts were driven by vertical king shafts (Königswelle) and fired by 2 distributors (Doppelzündung). The Carrera 2 was the first production Porsche with disc brakes!

This rare 356 Carrera 2000 GS was delivered new in 1963 to Torino / Italy - one of only 27 with electric sunroof! Restored years ago in Germany - also the engine was completly restored by german marque and Carrera Specialist. Invoices , data card and due diligence come with the car. This Carrera will be delivered with the original Kronprinz-Steelwheels and Speedster seats are also available. We also can deliver a Walkaround-Video on demand.
