Description:

The Rolls-Royce Flying Spur was the first Rolls-Royce which was equipped with a turbo engine. The proven 6.75-litre turbocharged V8 engine, which is also used in the Bentley Turbo R, gives this luxury saloon the **temperament of a sports car** and ensures great driving pleasure. The car reached the 100 km/h mark in 7.3 seconds and with a top speed of 224 km/h, this car was by no means sedate.

But Rolls Royce also left nothing to be desired in terms of luxury: With **automatic seat adjustment and heating** in the front and rear, **full leather** including headlining, **oak dashboard** and door trims as well as elaborate **chrome trim**, no compromises were made in the Flying Spur.

Rolls Royce planned a production run of just 50 vehicles. Due to the high demand, however, this was soon expanded, so that **a total of 134 vehicles** left the factory.

This four-door saloon with a long wheelbase is undoubtedly a successful combination of opulence and driving luxury, offering both the driver and passengers an almost incomparable travelling experience.

This Flying Spur is a first-class example in very good condition with a mileage **of just 68,260 kilometres**.

Equipment:

- Four-speed automatic
- Cruise control
- Automatic seat adjustment & heating
- Disc brakes with servo and ABS

Engine:

8- cylinder-Turbo engine, 340 hp, 6.750 ccm
