Description:

With the successful "Giulia" series, the Alfa Romeo factory successfully re-entered motorsport in the 1960s. The highly professionally prepared vehicles from **Autodelta dominated the touring car class for a long time.**

This **original 1750 GTAm** was prepared for racing **by Autodelta** for a private owner from Switzerland, according to available invoices. In recent years, the mechanics were extensively **overhauled by Alfa Romeo specialist Alexander Furiani** and **further developed and maintained by Steinke Sportwagenservice and Formula GT** in the years that followed. The car has taken part in the **Tour Auto and Modena Cento Ore** several times with **great success** and has **won several overall victories in the period G**. This Alfa GTAm is prepared to the highest standards and has a current FIA-HTP as well as a German road licence.
