Description:

In 1986 Aston Martin introduced the last stage of the Vantage V8's and achieved technical comparison with the shortly before offered V8 Zagato. In this series Aston Martin used the V580X called Zagato engine with at that point 438 PS. These engines still had big carburetors and in 1987 another step was made and now 438 PS were available (called Big Bore Package). Now these X-Pack called cars stood on Ronal wheels with 255/50 ZR 16 tires.

Rare opportunity to buy one of only 18 X-Pack Volante with LHD and manual shifting in as new condition! The X-Pack has the big engine with 5,8 ltr. and approx 400 PS. First registration was in Switzerland, imported about 15 years ago with only approx 1.350 km and rarely moved since - now only 1.395 km total mileage! EU customs paid.
