- Bentley GPS location tracking
- Keyless door opening
- 14-way electric seats incl. memory
- and much more

## Description:

The Bentley Continental GT is a luxury vehicle from the British manufacturer Bentley Motors Limited, which has been a subsidiary of Volkswagen AG since 1998. The abbreviation GT stands for Gran Turismo. The second generation, which was presented at the Mondial de l'Automobile 2010 in Paris, was launched at the beginning of 2011 and has only undergone subtle visual changes compared to the first generation. The previous twelve-cylinder engine was revised, increasing its output by 12 kW to 423 kW (575 hp). It also fulfils the Euro 5 emissions standard applicable from 2011.

The Continental GT Cabriolet offered here was delivered to its current owner via the Bentley dealer in Berlin in June 2014. Since then, the vehicle has been **with one owner and has only been driven approx. 37,069 km**. All **maintenance has been carried out regularly**. The **combination of comfortable luxury and outstanding performance** makes the Continental GT one of Bentley's most popular vehicles. A rare opportunity to acquire such a model, which impresses with its **low mileage**, its **elegant colour combination** and its **almost new condition**.

## Engine:

W12-engine, 423kW (575hp), 5998 ccm
