- Aluminium rims 15 holes
- Walnut woodtrim
- ABS
- Automatic Transmission
- Power electric windows
- Electric side mirrors
- Heated windshield
- Fog lamps
- Radio Becker Europe 2000

Description:

The SL model series (R107) came onto the market in 1971 as the successor to the so-called "Pagode" (W 113). It established a new design at Mercedes-Benz with its broadband H4 headlights and large fluted tail lights. The appearance of the R107 characterised the Mercedes-Benz design of the 1970s. A total of 237,287 vehicles were produced between 1974 and 1989, of which only 13,742 were 300 SLs (R 107 E 30)!

According to the original registration, the vehicle was first registered in Germany the 21. 10.1998.

The further ownership history is fully documented on the basis of registrations and purchase contracts. The vehicle comes with **ful paper work and a gapless service history**. This a great opportunity to purchase a **untouched, original condition** vehicle, with only **one previous owner** in a very **attractive colour scheme**. The **mileage of only 18.000km** makes this a perfect collectable.
