- Rear-view camera

Description:

The Ferrari 296 GTS combines innovative hybrid technology with classic driving dynamics. The twin-turbo V6 engine, in combination with the electric motor, delivers a total output of 830 hp – housed in an open-top spider with a retractable hardtop.

The vehicle offered here comes from **first ownership**, was delivered on 11.06.2024 by Ferrari Eberlein, and is in **like-new condition** with **only 498 km**. The colour combination of Grigio Scuro and Charcoal leather with yellow accents gives the vehicle a distinctive and elegant presence.

A modern supercar with collector potential and immediate availability – ideal for discerning enthusiasts and connoisseurs of the marque.
