- Heated seats
- Front and rear center armrests

### Description:

Production of the Bentley Continental DHC Series IV commenced in 1993. Following the closure of the renowned coachbuilder Mulliner Park Ward, the cars were subsequently built at Bentley's main factory in Crewe. The enhanced standard specification now included features such as an airbag and automatic climate control. In total, **only 219 examples** of this exclusive convertible were produced. The Continental DHC combines classic British elegance, handcrafted perfection and effortless V8 performance at the highest level, making it one of the most desirable luxury classics of its era.

This rare Bentley Continental Convertible is presented in **exceptionally well-kept condition**. The car was ordered through the Bentley dealership in Munich in 1992 and first registered in December 1994. Since then, it has had **only four owners** and has been **serviced regularly**, with supporting invoices on file. The **low mileage** of just 37.300 km is the result of careful fair-weather use only. The vehicle impresses with its attractive colour combination, excellent driving characteristics and fully traceable service and ownership history.

**Engine:** 8-cylinder with 6.750 cm<sup>3</sup> and 225 hp (factory data)
