- BOSE/Burmester (depending on vehicle configuration)
- Keyless Entry
- SportDesign package
- Lane keep and lane change assist
- Ambient lighting

Description:

The 911 GTS models have always represented the sporty heart of the range, combining the everyday usability of the Carrera with the driving dynamics of the GT models. As standard, they feature numerous performance components such as the lowered PASM sport suspension, the sport exhaust system, and further dynamic equipment features. The 992 offered here still features the classic biturbo boxer engine without hybrid assistance, and is precisely for that reason particularly sought after among Porsche enthusiasts.

This vehicle comes from its **first owner** and, with a mileage **of only 15,000 km**, is in very well-maintained condition. In addition to its extremely **extensive optional equipment with a list price of approx. €200,000**, it impresses with its **elegant colour combination** in **GT Silver Metallic** with truffle brown club leather upholstery. The vehicle recently received a two-year warranty extension (**Porsche-Approved**).
