- On-board computer
- Electric soft top
- Sound package with additional amplifier
- Porsche CD changer
- Leather interior
- Power steering

Description:

The Porsche 964 Carrera 2 Cabriolet with factory Turbo-look today ranks among the most sought-after variants of the air-cooled 911 series. The wide body of the 964 Turbo, combined with the classic cabriolet silhouette and the naturally aspirated 3.6-litre boxer engine, gives the WTL a look that is both powerful and elegant. Thanks to its low production numbers and striking appearance, this model holds a special place among collectors and enthusiasts.

This **rare colour combination** of Zermatt Silver metallic with Magenta leather further underlines the exclusive character of this Porsche. The car offered here, in the sought-after factory Turbo-look specification, was first registered to Porsche AG on 10 June 1992 and remained with them until April 1994. It has since been based exclusively in Germany and **has been with its 4th owner since 1996**. The car impresses with its **beautifully maintained overall condition, accident-free history** and a well-documented service and ownership history. **Matching numbers**, the **original service book** as well as extensive invoices document the history of this special Porsche. The engine and gearbox were completely rebuilt at 158,000 km. With a current total mileage of 169,000 km, the car presents itself in a very well-maintained condition, both technically and visually.
