THIESEN
AUTOMOBILE RARITÄTEN

Description:

The chassis was acquired in 1980 by John Paul Sr. for JLP Racing (USA) directly from the Porsche racing department, and subsequently completed with a **Kremer K3 body**. In 1982 the car was sold to Kevin Jeanette / Gunnar Racing and campaigned in the **IMSA series**. Thanks to its comparatively short racing history, the car is today in an **exceptionally original condition**. All major components have been preserved to a remarkable degree and fully correspond to the original specification of the Porsche 935. In the years that followed, the car was owned by renowned European collectors and took part in **major historic motorsport events**, including Peter Auto events, the Le Mans Classic and races at Silverstone.

With a **freshly rebuilt engine**, this presents a great opportunity to acquire an authentic Porsche 935 K3!
