THIESEN
AUTOMOBILE RARITÄTEN

Description:

Le Mans not only represents the motorsport legacy of the company, but the end of an era for the Coach Built car. The ultimate descendant of a line of models built from 1960 to 1999, engineered, manufactured and assembled by teams of Aston Martin's own highly skilled craftsman and engineers.

A scintillating 600 bhp, produced from the Marek designed 5.3 litre 4 cam all alloy engine. When combined with a sumptuous interior, tenacious grip and superb braking, resulted in a high speed continental touring car par excellence.

The V8 Vantage V600 Le Mans presented here is the **number 30 of only 40 (just 22 LHD)** vehicles of the rare Le Mans version. The car is now part of an important Aston Martin collection.

With **just 3 owners and only 1.750 km from new**, this Vantage V600 Le Mans is in superb condition. The car was **recently serviced by an Aston Martin specialist for 80.000,- €**. Due to its rarity, the car is an excellent investment for the Aston Martin enthusiast.

Equipment:

LHD, 6-speed automatic transmission, 18" wheels, Driving Dynamics Modification, air condition, audio system, power windows, central locking system with remote control, etc.
